PERSONAL STATEMENT

I completed a Ph.D. in **machine learning** in June 2024. My research focuses on training teams of agents with **multi-agent reinforcement learning**. Aside, I conducted projects on **neural network compression** for computer vision and **reinforcement learning** for drone control applications. I am particularly passionate about applying machine learning to address **real-world** challenges and contribute to **impactful applications**. I want to contribute to the development of concrete projects.

EDUCATION

Ph.D. in Machine Learning - <i>Montefiore Institute, ULiège, Liège</i> Advisors: Damien Ernst and Jonathan Pisane. Research interests: reinforcement learning and multi-agent systems. Thesis: Contributions to Multi-agent Reinforcement Learning .	08/2018 - 06/2024
Master in Computer Science and Engineering - <i>ULiège, Liège</i> Master's thesis: Automatic defect recognition in X-ray imaging by machine learning. <i>Cum Laude</i> - 75%	09/2016 - 09/2018
Bachelor in Engineering - <i>ULiège, Liège</i>	09/2010 - 06/2016

WORK EXPERIENCE

Research Engineer Montefiore Institute, ULiège Responsible for the research in projects with industrial consortia of Belgian companies. Responsible for writing proposals and administrative and financial reports.	08/2018 - Now
Student Trainee X-RIS: X-Ray Imaging Solutions (Liège) Development of image processing filters dedicated to X-ray image optimisation. Additionally, a master's thesis on automatic defect recognition in X-ray imaging by machine learning.	10/2017 - 06/2018

RESEARCH PROJECTS

Reinforcement learning for drone control WalEdgeIA: Embedded AI for Walloon SME: Facilitate embedded AI technologies for the industry. Partners: Sirris , Cetic , UMons , ULiège .	2023 - Now
Multi-agent reinforcement learning for infrastructure management planning Collaboration with Pablo G. Morato Multi-agent RL for planning inspections, repairs, or retrofits in structures like wind turbines. We maintain an open-source repository of these real-world environments published in NeuRIPS .	2022 - 2024
Neural network compression for monocular depth estimation IADAS: Artificial Intelligence for Autonomous Drones and Satellites: Design hardware and software for embedding neural networks in drones and satellites. Partners: Deltatec , Spacebel , Multitel , ALX , ULiège .	2021 - 2023
Multi-agent reinforcement learning for defense application IRIS: Intelligent Recognition Information System: Decision-aid based on detection, recognition, and analysis of behaviors and threats. Partners: John Cockerill Defense , ACIC , Multitel , Royal Military Academy , ULiège .	2018 - 2022
Automatic defect recognition in X-ray imaging by machine learning Master's thesis supervised by Vincent Libertiaux, Raphaël Marée and Pierre Geurts. Support for non-destructive testing with tree-based ensemble methods to detect defects in X-ray images. This work was done during my internship at X-RIS. Graded 85% .	2017 - 2018

SKILLS

Programming languages: Python, Bash, C, C++, Java, Matlab, Latex, Typst,...

Software development: Git, Agile, Docker, CI/CD, GCP, MLOPS.

Libraries: PyTorch, TensorFlow, Numpy, Matplotlib, Pandas, Onnx, RL libraries,...

Languages: French (native), English (professional proficiency).

PERSONAL EXPERIENCE

Association Generale des Etudiants Liegeois (AGEL) ASBL

10/2014 - 09/2016

Treasurer (2014-2015) and President (2015-2016)

AGEL is a non-profit organisation in charge of holding student events (turnover > 300k€, 15000 students).

As Treasurer, responsible for the financial viability and accounting management. As President, responsible for managing the team, public communication and major choices.

Federation des etudiants ULiege (FEDE) ASBL

10/2013 - 09/2016

Elected member of the general assembly and member of the Board of Directors of ULiège (2015-2016).

The FEDE is a non-profit organisation representing 23000 ULiège students to academic authorities.

Responsible for representing the Fede and the students as a member of the Board of Directors of ULiège.

PUBLICATIONS

IMP-MARL: a Suite of Environments for Large-scale Infrastructure Management Planning via MARL

Pascal Leroy, Pablo G. Morato, Jonathan Pisane, Athanasios Kolios, Damien Ernst

Thirty-seventh Conference on Neural Information Processing Systems Datasets and Benchmarks Track (NeurIPS), 2023.

Value-based CTDE Methods in Symmetric Two-team Markov Game: from Cooperation to Team Competition

Pascal Leroy, Jonathan Pisane, Damien Ernst

Deep Reinforcement Learning Workshop NeurIPS, 2022.

QVMix and QVMix-Max: extending the deep quality-value family of algorithms to cooperative multi-agent reinforcement learning.

Pascal Leroy, Damien Ernst, Pierre Geurts, Gilles Louppe, Jonathan Pisane, Matthia Sabatelli

AAAI-21 Workshop on Reinforcement Learning in Games, 2021.

TALKS

Multi-Agent Reinforcement Learning. Deep Reinforcement Learning, University of Groningen.

05/2023

Workshop on Reinforcement Learning and Multi-Agent RL. Thales Belgium.

04/2023

Emergent Tool Use From Multi-Agent Autocurricula. Advanced Machine Learning, ULiège.

04/2020

TEACHING

Optimal decision-making for complex problems (lecture on multi-agent RL).

2020 & 21 & 22 & 23

Introduction to artificial intelligence (Python projects).

2019 & 20

Complementary computer science course (C projects).

2019 & 20

REVIEWING

Workshop: SynS and ML (ICML, 2023).

AWARDS

NeurIPS Travel Award (2023).

REFEREES

Damien Ernst (dernst@uliege.be) - Ph.D. advisor.

Jonathan Pisane - Ph.D. advisor.
